

Welcome to the **New World** of **Affordability**

PALTOP System
 Four-Tier Advantage

environment is changing rapidly; client demands are increasing as are their expectations for speed and low cost all of which add pressure on clinicians. In addition, overhead costs are going up, putting further strain on the bottom-line. From conception, Paltop designed a system of self-reinforcing benefits all built around marrying quality –which often comes at a price –with affordability. This system has resulted in a series of tangible and intangible, yet real, financial benefits for its customers.

Tangible Financial Benefits:

- ✓ Implants, abutments and all other components will immediately save between 25% to 60% off other leading brands
- ✓ Reduced chair-time due to “Simplicity” benefits that increase productivity
- ✓ The drilling system enables clinicians to conduct immediate or delayed loading, use different implant diameters and lengths all with the same prosthetic platform thereby reducing inventory levels and complexity of managing stock

Intangible Financial Benefits:

- ✓ High quality surface and excellence in manufacturing can reduce recurring procedures
- ✓ Quality standards can help avoid high maintenance costs and complexities such as loose screws
- ✓ Simplified reduces chair-time that may increase overall customer satisfaction system
